

DESCRIPTION:

This beautifully handcrafted Prism Design Tiki Torch Topper from Nightscaping® was inspired by Sir Isaac Newton's experiments with light in the 1600s. His work was the beginning of the modern period of both optics and the understanding of light. The three-dimensional shapes on the Prism design Tiki Torch Topper represent the crystalline design of the Prisms Newton would use to separate the colors of the light he was experimenting with. Although your flame won't change color, you will truly enjoy the silhouette design of the faceted diamond shapes as the flames dance and shimmer around inside this unique bollard light tiki topper.
