

Nightscaping®

HANDCRAFTED OUTDOOR ILLUMINATION

Timeless.
Iconic.
Luminous.

A legacy of lighting design mastery

Since 1959, we've been illuminating landscapes with a handcrafted glow and crisp, intricately patterned shadows, a visual experience found only in our designs.

Make an even bigger statement by adding one of our bollard toppers: mailbox, birdbath, tiki torch, planter, or speakers.

Crafted in the U.S., our bollards come with a lifetime structural warranty. Most designs are available in a variety of sizes.

Artistic play on light and shadow

Inspired by the beauty of nature, symbols, classical art, and modern trends, our bollards and toppers are crafted of heavy-duty steel to withstand high-traffic areas and whatever the weather may bring.

There's nothing like the glow of home

COURTYARD SERIES

Suitable for smaller areas (or anywhere that typical "cap & stick" path lights are used), when the sun sets, these garden gems light up to create a magical landscape, illuminating pathways, the edges of patios, and garden spaces. Available as 2" x 2" x 24" path lights. Visit our website to see available designs.

GARDEN SERIES

Available in three sizes (17", 25", & 37" heights) and scalable to suit larger architecture and garden spaces, these mid-sized bollards are designed for mixing multiple sizes alongside walkways, garden borders, and even deeper into the garden as a focal point. Visit our website to see available designs.

ESTATE SERIES

For showcasing large residential, estate, or commercial properties, this series boasts five heights (13", 21", 32", 42", & 80") and enhances properties with a wide variety of plant heights and expansive garden spaces. These bollards can also be displayed as standalone works of art. Visit our website to see available designs.

ESTATE SERIES TOPPERS

Make an even bigger statement by adding one of our bollard accessories: mailbox topper, birdbath topper, tiki torch topper, planter topper, or speaker bases. Watch the birds, listen to music, light up a party—all illuminated by our unique play of light and shadow. Visit our website to view options.
