

Bonding Wire Installation Instructions: Guide For Pools/Spa Locations - Page 1

1. Install Nightscaping light bollard(s) in desired location according to the Nightscaping Bollard Installation Instructions (located on the website). Below is a wiring diagram for proper 12V installation around pool and/or spas. For Bonding wire installation, please refer to Page 2 on the Bonding Location Guide Sheet.
2. When installing the Nightscaping light bollards around a pool or spa **ONLY USE A 6 AWG OR LARGER** grounding copper conductor (shown on installation instructions on Page 2 of Bonding Location Guide Sheet).
3. For light operation within 15 feet of pool and/or spas, **ONLY USE A POOL AND SPA/ISOLATION SAFETY** rated transformer.

4. Please check local electrical codes to make sure the bollards are installed within county and state's guidelines. Each county and state varies on luminaries placement near pool and/or spas.
