HANDCRAFTED IN THE USA SINCE 1959

About Nightscaping[®]

Since 1959, Nightscaping[®] has built its reputation on designing original and handcrafted outdoor lighting fixtures. As an American design and manufacturing company, we pride ourselves on delivering works of art that transcend generations.

Customers who choose Nightscaping[®] consider their landscape lighting fixtures to be so much more than just another purchase. They consider it an investment that will last them a lifetime.

Nightscaping® Lightning Protection Device

Surge Protection Series

The Nightscaping® Lightning Protection Device is a Type 1 device, designed for outdoor applications. Engineered for both AC and DC electric systems, it protects both magnetic and electronic power supplies and LED/ Incandescent luminaires without interfering with the GFP protection circuit, it provides protection to service panels, load centers or where the Lightning Protection Device is directly connected to the electronic device(s) requiring protection.

Note: Maximum protection will only be achieved if the Lightning Protection Device is properly installed. Please read the Lightning Protection Device installation manual carefully and follow the instructions.

The Nightscaping® Lightning Protection Device provides maximum protection by reducing the clamping voltage to a safe voltage that your system can sustain without damaging any of the electrical components. Installing the Nightscaping® Lightning Protection Device will provide excellent protection and peace of mind for many years to come.

Features

ETL Listed

UL 1449 Type 1 Compliant

80 KA at 8/20 Pulse

Waterproof

Blue LED Indicator When "ON"

1/2" NPT Thread - Fits Standard Ground Stake

Protects Unlimited Number Of Luminaires

Proudly Designed & Made In Arlington, WA, USA

Other features

NOMINAL VOLTAGE: 0 to 90VAC & 0 to 115VDC

MCOV VRMS @ 1mA: 180V (162-198)

CLAMP V @ 100A CURRENT 8/20 PULSE: 295V

ENERGY ABSORPTION: 1120J (Full Device)

OPERATING TEMPERATURE: -40°C To +85°C

NOMINAL DISCHARGE CURRENT: 20kA

THERMAL DISCONNECTOR: Internal

RESPONSE TIME: <15n sec

DANGER: Electrical shock or burn hazard. Installation of this Lightning Protection Device should only be done by qualified personnel. Failure to lockout electrical power during installation or maintenance can result in fatal electrocution or severe burns.

CAUTION: This unit must be installed in accordance with the National Electrical Code (ANSI/NFPA-70) and applicable local codes.

CAUTION: Ungrounded power systems are inherently unstable and can allow excessively high line-to-ground voltages during certain fault conditions. During these fault conditions any electrical equipment, including a Lightning Protection Device, may be subjected to voltages which exceed their designed ratings. This information is being provided to the user so that an informed decision can be made before installing any electrical equipment on an ungrounded power system.

Please note Ground Rod Electrode (GRE) not included with NSPD. Refer to NEC code for length of GRE.

Celtic Design

CE® Bollard Light

The Nightscaping® Celtic design bollards draw inspiration from the many Celtic and Moorish designs that were weaved into fabric and textiles from that early era. The Celtic design displays the archetypical circle and cross pattern in a single row that ascends from the base of the fixture to the top, creating a very uniform but interesting shadow pattern on the adjacent ground and plant material.

| Width | | Height available per width | | | | |

MATERIAL

Nightscaping's® bollards are constructed from 11 gauge, square, solid steel tubing. The Cor-Ten Steel top is easily removable for service. This creates easy access to the luminaire's internal components.

FINISHES

Rust

Hammered Bronze

Black

MOUNTING OPTIONS

For the 2x2's, a 14", ABS injection molded, plastic stake with 1/2" NPS threaded female fitting is included with every luminaire. For the 4x4 and 6x6s, a stainless steel PVC mount is available. The Nightscaping® bollards can also be surface mounted using the Universal Mounting Plate (see website for details).

WIRING

25ft 18AWG, UL Listed, copper wire that is protected by Black Polyvinyl Chloride (PVC).

LAMP ADJUSTMENT

Each luminaire has an adjustment feature to not only adjust the distance of the light spread but also help to prevent light glare.

OPTIMAL VOLTAGE

Recommended voltage range for 12V Nightscaping® LEDs is 11V - 15V components.

Crosses Design

CE® Bollard Light

The Nightscaping® Cross design bollard is ideally suited for semi formal and orderly gardens where a classic, symmetrical pattern is desired. Drawing its interpretation from the French fleur-de-lis pattern, the shadows emitted from this fixture form a stunning chain of interlinking shadows surrounded by light.

OPTIMAL VOLTAGE

Recommended voltage range for 12V Nightscaping® LEDs is 11V - 15V components.

Diamond Design

CE® Bollard Light

The Nightscaping® Diamond design bollard was created by one of Nightscaping's top designers after his trip to visit the University of Sheffield where he fell in love with the modern geometric shapes of the Faculty of Engineering building. The diamond shapes found throughout the buildings modern architecture inspired him to create one of Nightscaping's bestselling bollards. The elongated shapes of the diamonds, combined with the continuous effect design that wraps around all four sides of the fixture, provides an uninterrupted geometric pattern that is juxtaposed to the natural forms of the landscape plantings, which is simply striking.

OPTIMAL VOLTAGE

Recommended voltage range for 12V Nightscaping® LEDs is 11V - 15V components.

Grove Design

CE® Bollard Light

The Nightscaping® Grove design draws its inspiration from the elegant and beautiful Aspen tree which grows naturally in the mountains and gardens of the Western United States. Considered to be the largest living organism on Earth, a 160-acre grove of Aspens in Utah covers more than 106 acres of land and is all from one original tree. This tree variety is also commonly referred to as a “Quaking Aspen”, due to the characteristic nature of its leaves which appear to tremble in the wind.

MATERIAL

Nightscaping's® bollards are constructed from 11 gauge, square, solid steel tubing. The Cor-Ten Steel top is easily removable for service. This creates easy access to the luminaire's internal components.

OPTIMAL VOLTAGE

Recommended voltage range for 12V Nightscaping® LEDs is 11V - 15V components.

Ivy Design

CE® Bollard Light

The Nightscaping® Ivy design light bollard is inspired by the many various forms of vines and climbing plants from across the world. The climbing leaves almost appear to be clamoring up the side of the fixture in a race to the top. The design contains a rather generic leaf shape which can be used in any type of garden or setting that is Ivy inspired.

Millennial Design

Bollard Light

Millennial Design bollard is a handcrafted, modern, pathway light that effortlessly combines form and function, enhancing outdoor spaces with its sleek and contemporary design. The Millennial walkway light features clean lines and a minimalist aesthetic that seamlessly integrates with modern landscapes. Emitting a warm and inviting glow, the LED technology within the fixture ensures energy efficiency and long-lasting illumination. Whether lining a garden walkway or adorning a contemporary patio, the modern pathway light not only guides footsteps but also adds a touch of sophisticated style to outdoor environments, creating a harmonious blend of practicality and aesthetics.

MATERIAL

Nightscaping's® Millennial Bollards are constructed from 11 gauge, SQ, solid steel tubing. The Cor-Ten Steel top is easily removable with a single Alan-head screw. This creates easy access to the luminaire's internal components.

Recommended voltage range for 12V Nightscaping® LEDs is 11V - 15V components.

Mission Design

CE® Bollard Light

The Nightscaping® Mission design light bollard recalls the old-world days when lanterns were an everyday item. Though primarily used to prevent a burning candle or wick being extinguished from wind or rain, another important function was to reduce the risk of fire. This was especially important below deck on wooden ships. Use of unguarded lights was taken so seriously that obligatory use of lanterns, rather than unprotected flames below decks was written into one of the few known remaining examples of a pirate code, on pain of severe punishment (article VI of Captain John Phillips's articles). The term used was "lanthorn", believed to be due to popular etymology, from the early use of horn windows in lanterns. The patterns and look of the Mission landscape lighting fixture are simply beautiful and remind us of those long-gone days of old.

Spiral Design

Bollard Light

The Nightscaping® Spiral design bollard reflects the whimsical pictograph forms found in the desert Southwest landscape. Indigenous people who lived in the western US would etch their life stories into nearby sandstone cave walls. This design is one of Nightscaping's more popular designs thanks to its stunning shadow patterns.

St James Design

CE® Bollard Light

The Nightscaping® St. James design is reminiscent of the formal Knot and Parterre garden designs of the French provincial and English Elizabethan era, which were dominated by clipped evergreen hedges shaped in precise geometric patterns and then filled with contrasting floral displays.

| | | | | | | |
|-------|---|----------------------------|-----|-----|-----|-----|

Wright Geo Design

Bollard Light

Wright Geo Design draws inspiration from Frank Lloyd Wright's stained glass triptych at the Avery Coonley Playhouse in Riverside, IL. Wright called it a "kinder symphony". These windows are purely geometric with vibrant primary colors. The arrangement of shapes resembles a controlled chaos of balloons, confetti, and flags, serving as the focal point of the kindergarten operated by Mrs. Coonley.

Celtic design Tiki Torch Bollard

CE® Bollard Toppers

This beautifully handcrafted Prism Design Tiki Torch Topper from Nightscaping® was inspired by Sir Isaac Newton's experiments with light in the 1600s. His work was the beginning of the modern period of both optics and the understanding of light. The three-dimensional shapes on the Prism design Tiki Torch Topper pair well with any of the Nightscaping bollard designs. You will truly enjoy the silhouette design of the faceted diamond shapes as the flames dance and shimmer around inside this unique bollard light tiki torch.

DIRECTIONS & SAFE USE

When pouring the Tiki® Torch fuel into the glass tiki torch container, pour slowly. Always store in and dispense Tiki® fuel from original container. Always keep fuel and open flames away from children and pets. For outdoor use only. As with all natural flame products there is an inherent risk, so do not leave the product unattended. For safe use, fully read the product label and follow all warnings and instructions.

This beautifully handcrafted Prism Design Tiki Torch Topper from Nightscaping® was inspired by Sir Isaac Newton's experiments with light in the 1600s. His work was the beginning of the modern period of both optics and the understanding of light. The three-dimensional shapes on the Prism design Tiki Torch Topper pair well with any of the Nightscaping bollard designs. You will truly enjoy the silhouette design of the faceted diamond shapes as the flames dance and shimmer around inside this unique bollard light tiki torch.

FEATURES

- Manufactured From US Grade Steel
- Proven Mosquito Repellent Using Tiki Torch Fuel
- Adjustable Fiberglass Wick (0.5" to 8" Flame) Snuffer
- 19 Hours of Burn Time For Mosquito Free Outdoor Living
- Proudly Made In West Chester, Pennsylvania

FINISHES

DIRECTIONS & SAFE USE

When pouring the Tiki® Torch fuel into the glass tiki torch container, pour slowly. Always store in and dispense Tiki® fuel from original container. Always keep fuel and open flames away from children and pets. For outdoor use only. As with all natural flame products there is an inherent risk, so do not leave the product unattended. For safe use, fully read the product label and follow all warnings and instructions.

LAMP ADJUSTMENT

Each luminaire has an adjustment feature to not only adjust the distance of the light spread but also help to prevent light glare.

OPTIMAL VOLTAGE

Recommended voltage range for 12V Nightscaping® LEDs is 11V - 15V components.

Celtic design Planter Bollard

CE® Bollard Toppers

Nightscaping's Planter Bollards are an innovative fusion of functionality and aesthetics, ideal for enhancing any outdoor space. These versatile fixtures combine the practicality of pathway lighting with the charm of decorative planters, creating a dual-purpose feature that adds both light and greenery to gardens, walkways, and patios. Available in a range of designs and sizes, Nightscaping's Planter Light Bollards can complement any landscaping style, from modern to rustic. The integrated lighting provides a soft, ambient glow, improving safety and visibility without overpowering the natural beauty of the surroundings. These bollards are perfect for homeowners looking to elevate their outdoor ambiance with a touch of elegance and creativity.

Diamond design Planter Bollard

CE® Bollard Toppers

Nightscaping's Planter Bollards are an innovative fusion of functionality and aesthetics, ideal for enhancing any outdoor space. These versatile fixtures combine the practicality of pathway lighting with the charm of decorative planters, creating a dual-purpose feature that adds both light and greenery to gardens, walkways, and patios. Available in a range of designs and sizes, Nightscaping's Planter Light Bollards can complement any landscaping style, from modern to rustic. The integrated lighting provides a soft, ambient glow, improving safety and visibility without overpowering the natural beauty of the surroundings. These bollards are perfect for homeowners looking to elevate their outdoor ambiance with a touch of elegance and creativity.

Celtic design Audio Bollard

CE® Audio bollard

Since 1959, Nightscaping® has built its reputation on designing original and handcrafted outdoor lighting fixtures. As an American design and manufacturing company, we pride ourselves on delivering works of art that transcend generations. Recently, Nightscaping® partnered with TruAudio® to introduce an audio light bollard that creates the ultimate outdoor living experience. Customers who choose the Nightscaping® Audio Bollards powdered by TruAudio® consider their landscape lighting fixtures to be so much more than just another purchase. They consider it an investment that will last them a lifetime.

MATERIAL

Nightscaping's® 6x6 Bollards are constructed from 11 gauge, 6" SQ, solid steel tubing. The CorTen top is easily removable with two Alan-head screws. This creates easy access to the luminaire's LED module which can be raised or lowered to eliminate light glare. The Audio Base is constructed from either Stainless Steel (powder coated options) or raw steel (weathered steel option).

FINISHES

Weathered Steel

Hammered Bronze

Matte Black

AUDIO OPTIONS

The Nightscaping Audio Bollard works with TruAudio's AS-360 or AS-1. Speakers sold separately and must be specified when Audio Bollard is ordered. Please see website for details.

MOUNTING OPTIONS

The Estate Series Nightscaping® Bollards can be mounted with Nightscaping's® Universal Mounting Plate, which can be installed in the landscape using the Stainless Steel PVC Stake Mount or onto a solid surface. For details, see the Installation Instructions.

LAMP ADJUSTMENT

Each luminaire has an adjustment feature to not only adjust the distance of the light spread but also help to prevent light glare. For use with Nightscaping's® 2W LED (included), 4W LED or 7W LED modules.

OPTIMAL VOLTAGE

Recommended voltage range for 12V Nightscaping® LEDs is 11V - 15V components.

Celtic design Mailbox Bollard

CE® Bollard Toppers

The beautifully handcrafted locking security Mailbox Bollard from Nightscaping® is your best line of defense against mail and identity theft. With its heavy-duty 11-gauge steel construction and lockable security door, your mail is guaranteed to be safe. The robust design ensures that it can withstand harsh weather conditions and deter even the most determined thieves, providing peace of mind that your sensitive information and packages are secure. Beyond its security features, the Nightscaping mailbox bollard offers unparalleled curb appeal. Its elegant design and customizable options allow it to blend seamlessly with any home exterior, adding a touch of sophistication to your property. The bollard can be tailored to match your personal style, with various finishes and decorative elements available to choose from, ensuring it complements your home's aesthetic perfectly. As night falls, the custom bollard and address plate illuminate, creating a welcoming glow that not only enhances the beauty of your home but also provides practical benefits. It's more than just a mailbox; it's a testament to thoughtful design and superior craftsmanship.

FEATURES

- Manufactured From US Grade, 11 Gauge, Steel
- Fits On Top of Any Estate Series 42" Bollard

Celtic design Address Bollard

CE® Address bollard

Custom address light bollards are a stylish and functional addition to any property, enhancing both aesthetics and security. Nightscaping's address bollards feature illuminated house numbers, ensuring clear visibility of the address at night. They are customizable in terms of design patterns, finish, and lighting options, allowing homeowners to match them with their landscape and architectural style. Beyond their practical use, these bollards contribute to curb appeal. Nightscaping's energy-efficient LED modules are used to create ample light output, providing long-lasting illumination with minimal maintenance. Overall, the custom address bollards are a unique blend of elegance and utility, perfect for modernizing any home's exterior.

MATERIAL

Nightscaping's® address bollards are constructed from 11 gauge, 6x6 square, solid steel tubing. The Cor-Ten Steel top is easily removable for service. This creates easy access to the luminaire's internal components.

Each luminaire has an adjustment feature to not only adjust the distance of the light spread but also help to prevent light glare. For use with Nightscaping's® 2W LED (included), 4W LED or 7W LED modules.

OPTIMAL VOLTAGE

Recommended voltage range for 12V Nightscaping® LEDs is 11V - 15V components.

St James design Address Bollard

CE® Address bollard

Custom address light bollards are a stylish and functional addition to any property, enhancing both aesthetics and security. Nightscaping's address bollards feature illuminated house numbers, ensuring clear visibility of the address at night. They are customizable in terms of design patterns, finish, and lighting options, allowing homeowners to match them with their landscape and architectural style. Beyond their practical use, these bollards contribute to curb appeal. Nightscaping's energy-efficient LED modules are used to create ample light output, providing long-lasting illumination with minimal maintenance. Overall, the custom address bollards are a unique blend of elegance and utility, perfect for modernizing any home's exterior.

MATERIAL

Nightscaping's® address bollards are constructed from 11 gauge, 6x6 square, solid steel tubing. The Cor-Ten Steel top is easily removable for service. This creates easy access to the luminaire's internal components.

Halo Design

Hanging Lights | Pendantliters

Nightscaping's Halo pendantlitter features a sleek minimalistic design that provides subtle illumination from above. The Halo mini pendant lights are a versatile and stylish lighting solution, perfect for a variety of outdoor living spaces. These compact fixtures, often used in clusters, can add a touch of elegance and focused illumination to outdoor dining areas, kitchen spaces, and lanais. Their small size makes them ideal for accent lighting, highlighting specific areas or features without overwhelming the space.

MATERIAL

Nightscaping's® Pendantliters are constructed from solid brass and 6061 aluminum tubing. The brass center body is easily removable with two small set screws. This creates easy access to the luminaire's LED module.

FINISHES

Hammered
Bronze

The Pendantliters are finished with Nightscaping's coppervein powder coat and antique brass finish. This allows the luminaire to blend seamlessly into the landscape and surrounding areas.

MOUNTING OPTIONS

The Pendantliters can be mounted with Nightscaping's® optional brass surface mount. The brass surface mount can be mounted to a solid surface using the Stainless Steel mounting screws included with each luminaire. (please see Installation Instructions for details).

WIRING

35ft 18AWG, UL Listed, copper wire that is protected by Black Polyvinyl Chloride (PVC).

Ivy Design

Hanging Lights | Pendantliters

Nightscaping's Ivy Design Pendantlitter features a frosted inner diffusion tube wrapped in a delicate leaf inspired form. The Ivy Pendantlitter proves a multi-directional source of light that is perfect to hang over tables or mount directly in garden structures. The Ivy design is in perfect harmony with the leafy elements of the garden and pairs perfectly in theme with Nightscaping's line of decorative bollards and path lights in the same Ivy design.

MATERIAL

Nightscaping's® Pendantliters are constructed from solid brass and 6061 aluminum tubing. The brass center body is easily removable with two small set screws. This creates easy access to the luminaire's LED module.

Luna Design

Hanging Lights | Pendantliters

Nightscaping's Luna Pendantlitter features a slim design with a fully frosted end to provide soft, multi-directional illumination. The Luna is ideal for areas where a non-directional light source can be utilized to add a soft, diffused glow to an area providing even illumination within garden and patio spaces. Pair the luna with the fixed base accessory under a pergola or patio cover and Luna becomes a practical area light, providing a soft ambient light for a variety of evening activities and get togethers.

MATERIAL

Nightscaping's® Pendantliters are constructed from solid brass and 6061 aluminum tubing. The brass center body is easily removable with two small set screws. This creates easy access to the luminaire's LED module.
